

# Community Pharmacy Provision of COVID – 19 Vaccine in Tasmania Guidelines and Application Process

November 2021

Version 5

# About the Guidelines and Application Process

These guidelines have been developed by Public Health Services, Department of Health (DoH) Tasmania to provide guidance to organisations that are approved to provide immunisation programs in Tasmania on the additional application process to be recognised as a 'community pharmacy' administering COVID – 19 vaccines.

The guidelines may be revised from time to time. For the most recent version of the guidelines visit [DoH Immunisation website!](#)

These guidelines are to be used in conjunction with the professional standards and guidelines that apply to each health discipline.

## Contact Details

For further information about the guidelines and the approval process please contact:

### **Clinical Nurse Consultant (Immunisation)**

## Community Pharmacy Definition

Community Pharmacy Agreements between the Commonwealth and the Pharmacy Guild of Australia have been in place since 1991, with their key purpose being to provide for the timely and equitable supply of Pharmaceutical Benefit Scheme (PBS) medicines across Australia.

Community pharmacies dispense prescriptions, provide advice on drug selection and usage to doctors and other health professionals, primary health care advice and support, and educating customers on health promotion, disease prevention and the proper use of medicines.

## Background

Selected community pharmacies will be involved in the National COVID -19 vaccination rollout. An expression of interest (EOI) was conducted by the Australian Government to identify individual community pharmacies capable of participating from Phase 2 of the national rollout onwards. Tasmanian community pharmacies lodged a total of 103 EOIs in response to the Australian Government's request.

Expanding existing Tasmanian immunisation program approvals to include selected COVID - 19 vaccines is at the discretion of the Tasmanian Director of Public Health. Introduction of community pharmacies to deliver COVID - 19 vaccine in Tasmania will occur as a graduated program.

## Application Process

A community pharmacy that has submitted an EOI to the Australian Government may apply to have its existing program approval with Public Health Services Tasmania expanded to include the relevant COVID - 19 vaccine by completing and submitting the Application Form for Expansion of Scope of Approved Vaccination Program to include COVID – 19 Vaccines including the Executive Declaration provided as Appendix A.

Public Health Services' Communicable Diseases Prevention Unit's (CDPU) immunisation team will assess each application based on whether it meets the requirements as outlined below. The Director of Public Health approves applications that meet these requirements.

## Assessment Criteria

Each application to be assessed for approval as a community pharmacy delivering a COVID – 19 vaccine service must meet all aspects of the following criteria:

- The pharmacy is recognised as eligible through the Australian Government's EOI process.
- The pharmacy has an existing program approval granted by the Tasmanian Director of Public Health.
- The pharmacy site has been assessed by the Tasmanian Pharmacy Authority and deemed an appropriate vaccination site.
- The application demonstrates that the listed Authorised Immunisers have successfully completed the mandatory COVID - 19 vaccine training, including the relevant vaccine-specific modules, and updates provided by the Australian Government Department of Health.
- The executive declaration component of the application form been completed and signed. The declaration is to confirm that the community pharmacy still complies with the Australian Government's EOI minimum requirements and is compliant with other minimum expectations (available here: [Community pharmacy covid-19 vaccine rollout from phase 2A<sup>2</sup>](#))

## Conditions of expanded scope

Community pharmacies that meet the above criteria will be recommended for sign-off for expanded scope by the Director of Public Health or delegate outlining the conditions of their expanded scope. Conditions on the expanded scope to include COVID-19 vaccines include:

1. Expiry date of approval is 30 June 2022 from the date of approval letter, unless otherwise revoked.

<sup>2</sup> [www.health.gov.au/sites/default/files/documents/2021/01/community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-may-2021-onwards.pdf](http://www.health.gov.au/sites/default/files/documents/2021/01/community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-may-2021-onwards.pdf)

2. For AstraZeneca COVID-19 (Vaxzevria) vaccine: clinical practice must align with ATAGI guidance for non-outbreak settings and TGA provisional approval, i.e.:

- First dose provision is limited to those aged 60 years and over.
- Second doses may be given to those aged 18 years and above who received their first dose without a serious adverse event, adhering to the recommended dose interval.
- Additionally, individuals with a relative or absolute contraindication, or a precautionary condition relevant to AstraZeneca, must be referred to their GP or specialist for vaccination.

3. For Spikevax (Moderna) COVID-19 vaccine: administration must align with ATAGI clinical guidance and TGA provisional approval, i.e.:

- Be administered to those aged 12 years and older.
- Individuals with a relative or absolute contraindication, or precautionary condition to Spikevax (Moderna) must be referred to their GP or specialist for vaccination.
- Note: currently Spikevax (Moderna) COVID-19 vaccine is **not** currently approved for use as a booster.

4. For Pfizer (Comirnaty) COVID-19 vaccine: administration must align with ATAGI clinical guidance and TGA provisional approval, i.e.:

- For a primary course: be administered to those aged 12 years and older.
- For boosters: be administered to those aged 18 years and older who received their second dose greater than 6 months ago.

5. Off-site vaccination is authorised if the requirements of an off-site COVID-19 vaccination service are met, as outlined below under 'requirements of an off-site COVID-19 vaccination service.'

6. Intern Pharmacists may administer COVID-19 vaccines under the supervision of an authorised pharmacist immuniser if they hold a Statement of Attainment from the Tasmanian PSA or Pharmacy Guild and have completed their Practicum as per the *Tasmanian Immunisation Program Guidelines*, and

7. The Responsible Officer of the approved program is compliant with the expectations outlined in the Executive Declaration.

## Additional clinical considerations

Pharmacist Immunisers are recommended to take additional precaution to ensure that a mixed dose schedule is not inadvertently administered (e.g. AstraZeneca – Moderna). Based on current evidence, ATAGI recommends using the same COVID-19 vaccine for the two doses of the primary course. In special circumstances, an alternative brand could be considered for dose 2 at the recommendation of a medical practitioner. It is recommended that the immunisation history of the individual is checked on the Australian Immunisation Register prior to administration of a COVID-19 vaccine to ensure the right brand and timing of vaccination is completed.

Please note that as many pharmacies will have more than one COVID-19 vaccine brand in their pharmacy, procedures should be in place to minimise risks. This includes ensuring that the correct vaccine is administered as per the relevant eligibility criteria and considering the differing age recommendations, precautionary conditions, contraindications, dose intervals, dose preparation and cold chain requirements. Vials should be kept in their original carton if unopened, and clearly labelled and stored separately once opened. Pharmacists may consider running dedicated sessions for specific COVID-19 vaccine brands to mitigate these risks.

## Boosters and third doses

Authorised Pharmacist Immunisers should be familiar with the differences between boosters and third doses.

### Third doses:

ATAGI recommends a third primary dose of COVID-19 vaccine in severely immunocompromised populations to address the risk of suboptimal or non-response to a standard 2 dose schedule.

- **Age & eligibility:**
  - ATAGI recommends that all individuals aged 12 years and over with certain medical conditions or on therapies leading to severe immunocompromise receive a 3<sup>rd</sup> primary dose of a COVID-19 vaccine. A list of the eligible conditions is here: [ATAGI recommendations on third primary dose of COVID-19 vaccine](#)<sup>3</sup>
  - To assess evidence of eligibility, please follow the guidance provided by the Australian Government: [Eligibility guidelines for third primary dose of COVID-19 vaccine](#)<sup>4</sup>
  - **Vaccine brand:** An mRNA vaccine (Pfizer or Moderna) is preferred over Vaxzevria (AstraZeneca) for this 3<sup>rd</sup> dose. AstraZeneca can be used for the 3<sup>rd</sup> dose for individuals who have received AstraZeneca for their first 2 doses if there are no contraindications or precautions for use, or if a significant adverse reaction has occurred after a previous mRNA vaccine dose which contraindicates further doses of mRNA vaccine (e.g. anaphylaxis, myocarditis)
- **Timing:** the recommended interval for the 3<sup>rd</sup> dose is 2 to 6 months after the 2<sup>nd</sup> dose of vaccine.
  - A minimum interval of 4 weeks may be considered in exceptional circumstances (e.g. anticipated intensification of immunosuppression; outbreaks).  
People who have received a 2<sup>nd</sup> dose more than 6 months ago should receive a 3<sup>rd</sup> dose as soon as feasible.

### Booster doses:

ATAGI supports the use of a single booster dose for those  $\geq 18$  years who have completed their primary COVID-19 vaccine course  $\geq 6$  months ago.

- **Age, eligibility and timing:**
  - Booster doses are not currently recommended for those aged  $< 18$  years.
- **Vaccine brand:**
  - Comirnaty (Pfizer) is recommended as a single booster dose, irrespective of the primary COVID-19 vaccine used.
  - Vaxzevria (AstraZeneca) Although not preferred, can also be used as a booster dose in the following situations:
    - For individuals who have received Vaxzevria (AstraZeneca) for their first two doses if there are no contraindications or precautions for use.
    - If a significant adverse reaction has occurred after a previous mRNA vaccine dose which contraindicates further doses of mRNA vaccine (e.g., anaphylaxis, myocarditis).

---

<sup>3</sup> <https://www.health.gov.au/sites/default/files/documents/2021/11/atagi-recommendations-on-the-use-of-a-third-primary-dose-of-covid-19-vaccine-in-individuals-who-are-severely-immunocompromised.pdf>

<sup>4</sup> <https://www.health.gov.au/sites/default/files/documents/2021/10/covid-19-vaccination-eligibility-declaration-form.pdf>

- Spikevax (Moderna) is not currently approved by the TGA as a booster. ATAGI will make a recommendation on the potential use of Spikevax as a booster in due course.

## Requirements of an off-site COVID-19 vaccination service

In order to for an Authorised Immuniser to administer approved COVID-19 vaccines off-site, the service provider must meet the following conditions:

1. The service must be linked to a community pharmacy with an existing program approval from the Director of Public Health to administer COVID-19 vaccines and have site approval by the Tasmanian Pharmacy Authority
2. Must meet all of the requirements outlined in the *Tasmanian Immunisation Program Guidelines*
3. Must meet all of the requirements outlined in the *Community Pharmacy Provision of COVID-19 Vaccine in Tasmania Guidelines and Application Process*
4. Must ensure they have appropriate insurance for the administration of vaccines and provision of vaccination service
5. Must ensure they are accredited through an appropriate quality assurance program
6. Must adhere to the requirements of the *Australian Immunisation Handbook* and the *National Vaccine Storage Guidelines – Strive for 5*, including equipment requirements
7. Must ensure that the vaccination space allows for visual and audible privacy and be of sufficient size to accommodate the patient (including space to manage an adverse event), an accompanying person and the authorised immuniser.
8. Must ensure that patients are monitored during the post-vaccination period in line of sight of the pharmacist immuniser or other qualified staff member\* for the recommended time
9. Must ensure that in addition to the authorised immuniser, that one other staff member who holds current first aid and cardiopulmonary resuscitation qualification is present when the vaccines are administered and during the post-vaccination period
10. Must ensure that an emergency response protocol is accessible and an accessible anaphylaxis response kit which complies with the recommendations of the Australian Immunisation Handbook
11. Must adhere to the site requirements concerning the physical environment, workforce requirements, cold chain management, multidose vial administration, record keeping, waste disposal, personal protective and other equipment, accreditation, accessibility and cultural safety and equipment as outlined by the Australian Government 'Community Pharmacy COVID-19 vaccine rollout from phase 2A': [Community pharmacy COVID-19 vaccine rollout from phase 2A](#)<sup>5</sup>
12. Must comply with any additional conditions of off-site vaccination as stipulated by the Commonwealth
13. Pharmacist Interns must only provide vaccination under the direct supervision of an Authorised Pharmacist Immuniser

\* A qualified staff member is defined as a member of staff who has current first aid certificate and cardiopulmonary resuscitation certificate

### Exclusions:

- Off-site vaccination activities in the following settings are not currently authorised:
  - educational settings (early learning, primary and secondary schools) and
  - residents of residential aged care facilities unless specifically requested by the resident's General Practitioner

## Cont'd - Application Form for Expansion of Scope of Approved Vaccination Program to include COVID - 19 Vaccines

### Executive Declaration

I, .....

(print full name)

The Principal Officer of the organisation / company:

.....

(company name)

Declare that:

- I have read and understood the information in the attached guidelines
- The information I have provided in this application is true and correct
- The immunisation program will be administered in accordance with the latest editions of the NHMRC *Australian Immunisation Handbook*, the *National Vaccine Storage Guidelines Strive for 5* and the *Tasmanian Immunisation Program Guidelines*
- I am aware that I will be subject to random audits of the immunisation service and may be required to submit copies of my organisation's policies and procedures
- I have provided a copy of this completed application form and the guidelines to each individual involved in the delivery of the immunisation program
- I have received approval from the TPA for the vaccination area within the pharmacy
- The pharmacy has a current Immunisation Program Approval with DoH Tasmania
- All immunisers have completed the mandatory COVID - 19 vaccine modules provided by the Australian Government, and all available updates and other professional development requirements as an authorised immuniser remain current
- I confirm that our site remains compliant with the Australian Government's Community pharmacy COVID – 19 vaccine rollout from Phase 2A [Community pharmacy COVID - 19 vaccine rollout from Phase 2A May 2021 onwards](http://www.health.gov.au/sites/default/files/documents/2021/01/community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-may-2021-onwards.pdf) (www.health.gov.au/sites/default/files/documents/2021/01/community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-community-pharmacy-covid-19-vaccine-rollout-from-phase-2a-may-2021-onwards.pdf)
- I understand that authorised immunisers that will deliver COVID - 19 vaccine are strongly encouraged to participate in training opportunities facilitated by the Tasmanian Vaccination Emergency Operations Centre.
