

# Tasmanian Role Delineation Framework and Clinical Services Profile: *Risk Descriptors for assessment*

## Low Risk

Initial assessment by Director, APSPMA and recommendation submitted to Secretary, DHHS, within 30 days of receipt of Application

### Service description amendments

- the correction and update of typographical errors
- insubstantial amendments, such as service or workforce requirements wording changes or service level descriptors

## Medium Risk

Initial assessment by PPP Executive (Incl CFO) and recommendation submitted to Secretary, DHHS, within 45 days of receipt of Application

### Existing Service update

- Update to one service only (including assessment of service level change at each site/s) with no impact on other services
- If it is a support service level amendment then it must document the impact and sustainability of other services
- Service and workforce requirement amendments that impact on the change of service level

#### Considerations for assessment

- Any funding/purchasing implications including per annum costing for additional FTE and resourcing
- Any workforce implications
- Sustainability of service level change/increase
- Any other relevant financial or service-related implications

## High Risk

Initial assessment by Clinical Expert Panel and recommendation submitted to Secretary, DHHS, within 60 days of receipt of Application

### New Service or update to Service with significant changes

- All **new** statewide service and support service applications
- Changes and updates to an existing service that affect multiple services and/or TRDF/CSP

#### Considerations for assessment

- In addition to above: short description provided on the implementation milestones and timeframes

**Appeals Process:** Applicant can submit a written appeal within 14 days.

Appeal Delegate: Minister for Health
